DO NOT OPEN RELOAD KIT UNTIL READY TO USE.

PARTS:

RMS™-75 HARDWARE

75mm aft closure 1
75/5120 case 1
75mm plugged forward closure 1
75mm forward seal disk 1

RELOAD PARTS KIT

Nozzle (large black plastic part) 1
Liner (2-3/4" O.D. black plastic tube) 1
Propellant grains (7/8" core) 4
Fwd & aft o-rings (1/8" thick X 2-3/4" O.D.) 2
Forward seal disk o-ring (3/32" thick x 2-9/16" O.D.) 1
Grain spacer o-rings (1/16" thick x 2-1/2" O.D.) 3
Smoke charge (short solid part) 1
Smoke charge insulator (1-1/2" O.D. tube) 1
Liner Cap (2-1/4" dia. red cap) 1

ITEMS NEEDED FOR USE:

• Synco™ Super Lube™ or other grease
• Hobby knife
• Electric match or/with mallite, Firestar™ or other igniter
• Masking tape
• Wet wipes or damp paper towels
• Disposable rubber gloves

SAVE THE RELOAD KIT PLASTIC BAG FOR THE USED RELOAD PARTS. DISPOSE OF BAG AND PARTS PROPERLY.

Chapter 1. Forward Closure Assembly

1-1. Apply a light coat of Synco™ Super Lube™ or other grease to all threads and all o-rings (except the grain spacer o-rings). This will facilitate assembly and prevent the threads from seizing.

1-2. Hold the forward (black) closure in a vertical position, smoke charge cavity facing up. Insert the smoke charge insulator into the smoke charge cavity until it is seated against the forward end of the cavity.

1-3. Apply a liberal amount of grease to one end of the smoke charge element. Insert the grease into the smoke charge element until it is seated against the end of the cavity. Set the completed forward closure assembly aside.

Chapter 2. Case Assembly

2-1. Using a hobby knife or similar tool, carefully deburr (chamfer) both inside edges of the liner tube (2-3/4" O.D. black plastic tube).

2-2. Insert the larger diameter portion of the nozzle into one end of the liner, with the nozzle liner flange seated against the liner. NOTE: Mojave Green RMS-75/5120 motors use a single large throat nozzle rather than the multiple-throat “Medusa” nozzle shown in the illustrations.

2-3. Perform the remaining assembly steps with the liner held in a horizontal position. Install the propellant grains into the liner, placing the three (3) grain spacer o-rings (1/16" thick x 2-1/2" O.D.) between each propellant grain. The aft grain should be seated against the nozzle grain flange. NOTE: The use of disposable rubber gloves when handling Mojave Green propellant grains is strongly recommended. Three propellant grains are shown in all illustrations for simplicity. RMS-75/5120 motors use four (4) grains.

2-4. Place the greased forward seal disk (3/32" thick X 2-9/16" O.D.) o-ring into the groove in the forward seal disk.

2-5. Insert the smaller (o-ring) end of the seal disk into the open end of the liner tube until the seal disk flange is seated against the end of the liner.

2-6. Push the liner assembly into the motor case until the nozzle protrudes approximately 1-3/4" from the end of the case. NOTE: A coating of grease on the outside surface of the liner will facilitate installation and casing cleanup after motor firing.

2-7. Thread the previously-completed forward closure assembly into the forward end of the motor case by hand until it is seated against the case. NOTE: There will be considerable resistance to threading in the closure during the last 1/8" to 3/16" of travel.

2-8. Place the greased aft (1/8" thick X 2-3/4" O.D.) o-ring into the groove in the nozzle.

2-9. Thread the aft closure into the aft end of the motor case by hand until it is seated against the case. NOTE: There will be considerable resistance to threading in the closure during the last 1/8" to 3/16" of travel. It is normal if a slight (1/32" to 1/16") gap remains between the closure and the case, and the grains rattle slightly in the liner after tightening.
Chapter 3. Preparation For Flight
Install Igniter Against Smoke Charge

Fig.-13: Insert the coated end of a Firestar™ or other igniter through the nozzle throat until it stops against the smoke charge element.

Chapter 4. Post-Recovery Cleanup

NOTE: Perform motor clean-up as soon as possible after motor firing. Propellant and smoke charge residues become difficult to remove after 24 hours and can lead to corrosion of the metal parts. Place the spent motor components in the reload kit plastic bags and boxes and dispose of properly.

4-1. After the motor has cooled down, unthread and remove the forward and aft closures.

4-2. Remove the smoke charge insulator from the forward closure and discard. Using wet wipes or damp paper towels, remove all smoke charge and propellant residues from the closures.

4-3. Remove and discard the forward and aft o-rings from the motor case. Remove the liner, forward seal disk and nozzle from the casing by pushing on the nozzle end. Remove the forward seal disk from the liner, and remove and discard the forward seal disk o-ring. DO NOT DISCARD THE FORWARD SEAL DISK! Discard the nozzle and liner. Using wet wipes or damp paper towels, wipe the inside of the casing and the forward seal disk to remove all propellant residue.

4-4. Apply a light coat of grease to all threads and the inside of the motor case. Reassemble metal parts and store motor in a dry place.

Chapter 5. First Aid

DANGER: DO NOT INGEST PROPELLANT OR BREATHE EXHAUST FUMES! WASH HANDS AFTER HANDLING MOJAVE GREEN PROPELLANT AND BEFORE EATING. For a minor burn, apply a burn ointment. For a severe burn, immerse the burned area in ice water at once and see a physician as quickly as possible. In the unlikely event of oral ingestion of the propellant, induce vomiting and see a physician as quickly as possible. Mojave Green composite propellant consists primarily of Ammonium Perchlorate, Barium Nitrate and a rubber-like plastic elastomer.

Chapter 6. Disposal

Damaged or defective reload kits should be returned to RCS.

Chapter 7. Fire Safety

Tests show that the pyrotechnic components of RMS™ reload kits will not explode in fires and normally will not ignite unless subjected to direct flame and then will burn slowly. Use water to fight any fires in which AeroTech/RCS RMS™ reload kit pyrotechnic components may become involved. Directed the water at the AeroTech/RCS RMS™ reload kit pyrotechnic components to keep them below their 550 deg. F autoignition temperature. Foam and carbon dioxide fire extinguishers will NOT extinguish pyrotechnic components. Keep reload kit pyrotechnic components away from flames, sources of heat and flammable materials.

Disclaimer and Warranty

NOTE: As we cannot control the storage and use of our products, once sold we cannot assume any responsibility for product storage, transportation or usage. RCS shall not be held responsible for any personal injury or property damage resulting from the handling, storage or use of our product. The buyer assumes all risks and liabilities therefrom and accepts and uses AeroTech/RCS products on these conditions. No warranty either expressed or implied is made regarding AeroTech/RCS products, except for replacement or repair, at RCS’s option, of those products which are proven to be defective in manufacture within one year from the date of original purchase. For repair or replacement under this warranty, please contact RCS. Proof of purchase will be required. Note: Your state may provide additional rights not covered by this warranty.

HIGH-POWER RMS™
Reloadable Motor System™

RMS™ 75/5120 Mojave Green™

This Package Contains One Reload Kit:

□ M1500G-P (75/5120)

NOTE: This reload kit MUST be used with separately packaged Mojave Green™ propellant grains (P/N 03G045-1) and motor liner tube (03035-4). RMS™-75 reload kits do not include an ejection charge. RMS-75 motors must be used in conjunction with a timer, altimeter or radioactive recovery system.

DO NOT OPEN RELOAD KIT UNTIL READY TO USE

Typical Time-Thrust Curve:

Hardware Designation Performance Designation Total Impulse (Typical) Propellant Weight Loaded Motor Weight

RMS™-75/5120 M1500G-P 5,224 N-sec 2,631 g (5.80 lb) 4,896 g (10.78 lb)

NOTE: Total impulse shown is typical.

RMS™ 75MM HARDWARE DATA

Hardware Designation Motor Diameter Motor Length Hardware Weight Reload(s) Used

RMS™-75/5120 2.965” (75mm) 26.20” 1,408 g (3.10 lb) M1500G-P

NOTE: Motor lengths are measured from end of aft closure to end of forward closure.

NOTE: SALE TO PERSONS UNDER 18 YEARS OF AGE PROHIBITED BY FEDERAL LAW.
DANGER-POISON: Contains Barium Nitrate. DO NOT INGEST PROPELLANT OR BREATHE EXHAUST FUMES. WARNING-FLAMMABLE: Read Instructions Before Use. KEEP OUT OF REACH OF CHILDREN. FOR USE ONLY BY CERTIFIED HIGH-POWER USERS 18 YEARS OF AGE OR OLDER. DO NOT SMOKE when loading these motors or use in the vicinity of open flames.
